

The Right Care at the Right Time

Presented by Zulmarie Ortiz, MD, Vitas Healthcare

Become an informed healthcare advocate for your loved one. Find answers at our “Meet the Doc” event:

- Have you noticed a decline in the health of your loved one in the past 6 months? Decreased alertness? Increased sleeping or mental confusion?

- Does your loved one require more help when performing daily tasks — eating, walking, getting dressed, using the bathroom, personal hygiene?
- Has your loved one lost a significant amount of weight because of difficulty eating or a reduced desire to eat?
- Has your loved one experienced recurring infections or frequent trips to the hospital or ER? Uncontrolled pain, shortness of breath, nausea, vomiting?
- Has the doctor spoken with you about decisions to focus on quality of life instead of aggressive treatments?
- Discuss options for improved quality of life and comfort-focused care, and engage in family discussions about the Medicare hospice benefit.

RSVP by Friday, April 14th

Join us for this **FREE** Community Event

Tuesday, April 18th
